CHINESE
WISTARIA

THOSE who have previously received our catalogues will miss the *illustrations* in this issue. We believe that the plant-purchaser knows what he wants, and is most interested in what we have for sale, the sizes and prices, printed in plain, large type, and does not depend to any extent upon catalogue illustrations for guidance. Anyone seeking advice on garden or landscape matters will please refer to the inside back cover page of this catalogue. We will send, on request, a list of carefully selected books, covering the entire field of horticulture.

Important to Purchasers

PRICES—NOTE CAREFULLY

Single-rate prices are for less than five of a kind.

Ten-rate prices are for five or more, and less than twenty-five of a kind.

Hundred-rate prices are for twenty-five or more, and less than 250 of a kind.

Thousand-rate prices are for 250 or more of a kind.

We cannot agree to fill small orders for a few of a kind for less than single rates, as it oftentimes takes one over many acres of ground to fill a single order, and the proportionate expense of digging and packing orders must be taken into account.

SPECIAL DISCOUNTS ON TREES AND PLANTS to those who send us orders for less than five of a kind, shipped at the same time, amounting to the following:

- | | |
|--|--|
| Orders amounting to \$10, a discount of 5 per cent | } FROM SINGLE-RATE CATALOGUE PRICES ONLY. |
| Orders amounting to \$30, a discount of 10 per cent | |
| Orders amounting to \$50, a discount of 15 per cent | |
| Orders amounting to \$75, a discount of 20 per cent | |
| Orders amounting to \$100, a discount of 25 per cent | |
- Special discounts on larger orders. Send us list for estimates.

Trees and Plants individually selected at our nurseries, or special quotations, will be charged for according to quoted price *without discounts*.

TERMS. Cash in advance from unknown parties, or satisfactory reference. We send invoice at time of shipment of order, and should any error be noticed on receipt of goods, notify us immediately, and we will do all in our power to see that it is rectified.

HOW ORDERS ARE SHIPPED. We ship large trees and other bulky orders by freight, unless otherwise requested. Medium-sized orders can be shipped by express to advantage; this is especially advisable where immediate arrival is desired. All orders are delivered free to local freight or express companies and in the city. We are not liable for delays by forwarding companies. If stock is not promptly received, notify us and we will trace.

PACKING. We charge for packing at cost, when stock is purchased at hundred-rate prices, or in case of large, bulky stock, or where we ship with carefully preserved balls of earth. Otherwise *we make no charge for packing*.

HOW TO REACH US. Our nursery and office are located at EDGEWOOD, Edgewood Avenue, just beyond Edgewood Park. *See Guide Map on inside back cover.*

EARLY ORDERS. To one familiar with the rush at the packing season, it must be obvious that it is impossible to fill an order requiring much time in its preparation on short notice, without doing an injustice to others who have their orders previously booked. In fairness to all, we have adopted the practice of filling orders in the rotation received, unless orders reach us far enough ahead of the packing season, with instructions to ship at a given date, so that we can arrange a special shipping date. So we again say—*place your order as far in advance of shipping as you possibly can*, stating when you would like stock sent.

IMPORTANT NOTE. Visitors are always most cordially welcome. During the spring and fall there are short intervals, however, when it is quite impossible for us to devote much time to showing parties about the nursery, as these are the most strenuous shipping periods of the entire year.

TRANSPLANTING DIRECTIONS. This instructive pamphlet we are pleased to send on request.

TREES

The following lists are so arranged that quick reference can be made to sizes and prices of the stock we have to offer. We have used a popular classification, as follows:

- TREES.** Pages 1 to 11. Shedding foliage in the Autumn. Example, Maple.
- EVERGREENS.** Pages 12 to 18. Foliage remaining on tree throughout the year. Example, Norway Spruce.
- BROAD-LEAF EVERGREENS.** Pages 19 to 21. Foliage remaining throughout the year. Example, Rhododendrons.
- SHRUBS.** Pages 23 to 34. Shedding foliage in Autumn. Example, Lilac.
- VINES.** Pages 35 to 37. Example, Wistaria.
- HERBACEOUS PERENNIALS.** Pages 38 to 52. Hardy permanent roots. Above the ground the growth is renewed annually. Example, Paeonia.
- HARDY ROSES.** Pages 53 to 54.
- FRUIT DEPARTMENT.** General list of fruit trees and small fruits. Pages 55 to 59.

The Botanical names are inserted alphabetically in **THIS TYPE**, under their respective classes, and refer to the popular, common or English names.

Examples—**ACER**, see Maple; **PICEA**, see Spruce, etc.

EVERGREENS

Evergreens are a specialty with us and our collection includes many rare and beautiful specimens as well as a large stock of the more common sorts. We are fortunate in having soil conditions very favorable for their development, both of top and root. We transplant and root-prune all our evergreens frequently, which practically insures their successful transplanting, even of the larger specimens.

How to Ship Evergreens.

We recommend hauling by teams when delivery is within economical distance. Small orders to distant points can be boxed for shipping by freight or express, but where a number of specimen trees are to be sent, we advise shipping in bulk in ear lots; this saves the cost of boxing and insures their arrival without injury. We gladly advise, if requested, the shipping method we recommend for individual shipments.

Forestry Evergreens.

We strongly recommend the use of either two-year old seedlings or three-year old transplants for forest plantation. The latter are much stronger and better able to withstand severe conditions. *Inquire for Special list.*

BROAD LEAF EVERGREENS

THE great beauty of the broad leaf evergreens makes them most valuable for gardening purposes. Many are among our most spectacular and gorgeous flowering shrubs, while their broad, attractive leaves show out most effectively during the parts of the year when many trees and plants are without foliage. There is practically no end to the charming results that can be gained by the liberal use of this class of plants. Groupings generally give most attractive effects and the plants themselves do much better when planted this way.

Good, fertile loam should always be used in preparing for this class of plants. Sufficient water should be supplied at least until they become well established so that they will not suffer from dryness. This does not necessarily mean frequent watering.

RHODODENDRON MAXIMUM (Rose-Bay).

This native broad-leaf strictly hardy evergreen affords splendid opportunity for no end of charming effects. In large public parks and private estates they can be used by thousands, and even within the more restricted area of the usual city lot many chances for their liberal use are sure to arise. This beautiful Rhododendron is perfectly hardy and thrives luxuriantly even in the shady corner and under trees. Our stock is collected high up on the tablelands of the Allegheny Mountains where it is so very cold and exposed to such severe weather conditions that even the native trees are dwarfed in growth.

Formal Trees and Shrubs

THE ELM CITY NURSERY COMPANY

THE popular demand for formal trained trees and plants is now very great. We have gathered together from various European and other sources a large collection of splendid specimen Bay-trees, Box, Holly, etc., adaptable to this special purpose. They are grown in tubs, boxes, etc., and can be shipped any time.

Bay Trees (*Laurus Nobilis*).

These dignified stately plants are without rivals for many formal uses. They will stand almost every summer exposure and several degrees of frost without injury. Now in tubs and can be shipped any time.

We have assembled a splendid collection of these plants in various varieties and sizes so useful in creating charming garden effects. Inquire for special list of stock on hand or better, visit the nursery and see them. These are mostly in tubs and pots and can be shipped any time.

Special Japanese Exhibit.

A rare collection assembled personally by one of the members of the Company while in Japan recently, is on exhibition at the Nursery. The individual specimens are not for sale singly, as the collection is too valuable to be broken up. A price will be considered, however, for the entire collection. A number of these trees are of great age and all of them are most interesting in their forms and expressions—a rare treat well worth seeing.

A Gift of Vines for Churches and Public Buildings.

We will be pleased to donate from 3 to 10 nice stocky plants of *Ampelopsis Veitchii* (Boston Ivy). This is the vine that grows so attractive on walls and turns a brilliant red in the Fall. The understanding is that these vines are to be planted about the foundation wall of the church or public library buildings and given necessary care for their welfare. We would prefer applications authoritatively signed.

Boston, Mass., February 2, 1914.

"I am very glad to say that all my dealings with The Elm City Nursery Co. have been entirely satisfactory. All of the stock which you have sent me from time to time is doing well, and whenever any mistake has been made I have always found you prompt to rectify it. Please send copy of your latest catalog as I wish to send an order for Spring planting." Very truly yours, E. N. F.

HERBACEOUS PERENNIALS

These include such splendid garden plants as Pæonies, Iris, Larkspurs, etc. The great ease with which these plants can be grown, their great variety of color and season of bloom makes them indispensable for the garden. We are making them a specialty at the nursery, growing them in large quantities.

In arranging this list we have used the popular or common names as far as seemed consistent.

The following **Hardy Herbaceous Plants** are offered in three sizes, as follows, unless otherwise noted. The very heavy field clumps can only be supplied in the sorts marked with a * to the left. Stock can be potted to order and held for any delivery date.

Herbaceous Perennials

THE ELM CITY NURSERY COMPANY

CHRISTMAS ROSE (*Heleborus Niger*). 6 to 12 inches. October to March.

This very interesting plant really produces its flowers in the winter, out of doors. Daintily colored begonia-like blooms almost hidden in a clump of glossy evergreen leaves. It is best to select a place for this plant which is sheltered from the winds in winter and where it can remain for years undisturbed. With a light, temporary frame placed over the plants so as to protect from the snow and ice, the blooms develop far more freely and perfectly. Clumps 50 cents, other sizes see top of page 38.

Also the following Christmas Rose Hybrids.

ALBA OTTO. White, spotted crimson purple.

APOTHEKER BOGREN. Rose purple. Very large.

ATRO-RUBRUM. Reddish-purple flowers.

DR. SCHLEICHER. Large. White inside, green outside.

F. C. HEINEMANN. Large, deep purple, mottled.

FRAU IRENE HEINEMANN. Rose purple outside, greenish white inside.

GRETCHEN HEINEMANN. Rosy-purple, crimson spots.

WM. SCHMIDT. Pure white flowers.

CHRYSANTHEMUM LEUCANTHEMUM HYBRIDUM, sec Daisy.

CHRYSANTHEMUM MAX. King Edward VII (Moonpenny Daisy). 2 to 3 feet. June to August. Very large pure white flowers, excellent for cutting, a splendid addition to our hardy plants.

***CHRYSANTHEMUM ULIGINOSUM** (The Giant Daisy). 4 to 5 feet. July to September. Splendid plant for tall effects.

CHRYSANTHEMUM HARDY GARDEN.

The hardy garden types are most valuable for late Fall flowers. The plants we offer are well established in pots and will flower abundantly the first season. Price per pot, 25 cents; per 10 pots, \$2.00; per 100 pots, \$15.00.

VARIETIES.

ABIGAIL. Flowers large rosy red with salmon tints at full maturity, showing yellow center.

***Japanese Iris.**

(Iris Kaempferi or Laevigata.)

This splendid type of Iris is one of the most important of our strictly hardy permanent garden plants. For effective habit and gorgeous display of color it stands alone at its blossoming season, which is June 20th to July 20th.

VARIETIES.

- BLUE JAY.** Late, medium tall, vigorous, very large, splendid form; deep yellow at base, changing to a soft azure blue.
- DINAH.** Mid-season, very tall, medium to large, double, deep blue suffused with royal purple.
- FRANCELLA.** Early medium tall, medium size, segments uniform size and broad, almost white at base, changing to deep rose at margins, effective.
- GOLD-BOUND.** Medium, tall, pure double white.
- KATHRYN.** Early, tall and vigorous; broad, pale blue, beautifully veined royal purple.
- KUMO-NO-SHO.** Double, mid-season, tall, good size, white at base; freely veined rose, which suffuses the segment at the outer margin.
- KUMO-NO-NYE.** Late, double, splendid form, richest velvety royal blue, suffused slightly with royal purple, brilliant yellow throat.
- OSHOKUN.** Double, early, very tall and branching, flower large and showy, segments rich blue penciled deeper blue with white radiating lines.
- PYRAMID.** Early to late, very strong grower and free bloomer, of largest size and splendid form, segments light blue at base, to deep blue on margin, suffused with royal purple.
- ROSY-MORN.** Mid-season, tall and graceful, white at base, shading to deep rose.
- URC-IN.** Double, mid-season, tall and much branched, flower large, pale blue white changing to rich clear blue.

Iris Pumila.

(Hybrids).

This is a new race of charming Iris, intermediate between the early Pumila and Germanica, in time of blooming and size of flower.

- ATROVIOLACEA.** 6 to 10 inches. Medium dwarf, early to mid-season. Violet mauve to maroon red, paling to light on the margin.
- BRIDE.** 12 to 15 inches. Mid-season. Clear ivory white, veined with green and yellow.

Lilies.

(Hardy Garden).

The family of lilies includes some of our most beautiful garden flowers and fortunately some of the most beautiful of them are perfectly hardy. There are many of them of easiest culture and even the less easy ones to succeed with, bountifully repay for any extra attention they may exact.

*ADAM'S THREAD AND NEEDLE (*Yucca Filamentosa*). One of the most valuable plants in cultivation for general garden and landscape planting. Its dagger-like foliage, which is evergreen, forms an attractive clump of foliage, from which appear, in July and August, tall and stately spikes 3 to 6 feet high, bearing large panicles of white lilies, which are most picturesque and decorative.

BELLADONNA LILY (*Amaryllis Hallii*). 2 feet. July and August. Beautiful flowers in umbels. 3 to 4 inches across, of a delicate lilac pink, very attractive.

BLACKBERRY LILY (*Belemnanda Chinensis*). 2 to 3 feet. June and July. Yellow.

DAY LILIES (*Funkia*). These charming garden lilies are very useful in the hardy border, as a foreground to shrubbery groups and about the foundations of buildings, etc. Their clusters of heart-shaped leaves and graceful flower heads showing effectively. They thrive well in partial shade, as well as in full sunshine. *The following varieties are all very desirable.*

*BLUE DAY LILY (*Coerulea*). 2 feet. August, September. Dark green glossy foliage, flowers light blue.

*BROAD-LEAVED DAY LILY (*Ovata*). 2 feet. August and September. Large ovate foliage, flowers light blue.

*FORTUNE'S DAY LILY (*Fortunei*). 2 to 3 feet. July. Rare type. Large, glaucous, heart-shaped leaves, pale lilac.

*LANCE-LEAF DAY LILY (*Lanceifolia*). 1 to 2 feet. August to October. Long glossy foliage, lilac flowers.

*SIEBOLD'S DAY LILY (*Sieboldii*). 1 to 2 feet. July and August. Another beautiful sort with silvery blue tint to foliage. Flowers pale lilac.

*VARIEGATED DAY LILY (*Undulata*). 8 to 12 inches. July and August. A very popular variety; leaves variegated white and green.

*WHITE DAY LILY (*Subcordata*). 1 to 2 feet. July and August. Large light green leaves, flowers purest white.

CORAL LILY (*L. Tenuifolium*). One of the most delicate and charming species. 1 to 2 feet high, with 1 to 15 or more nodding rich scarlet flowers.

ELEGANS LILY (*L. Elegans*). These hardy lilies are very showy and of easiest culture, producing, during the early summer, their brilliant flowers very freely. *The following are all attractive varieties.*

VAR. AURORA. Deep rich orange, suffused scarlet.

VAR. BICOLOR. Bright red flushed orange, very showy and large.

VAR. LEONARD JOERG. Rich apricot spotted; very fine.

VAR. PAINTED CHIEF. Bright flame color.

VAR. ROBUSTA. Magnificent large flower; orange spotted black.

VAR. SANGUINEUM. Very rich dark red with few spots.

VAR. WALLACEI. One of the smaller and later forms; a very reliable one for general use.

GOLDEN-BANDED LILY (*L. Auratum*). This is a most popular lily. No species ever had so much general favor. Flowers white, with a central golden band and numerous deep purple spots. Height, 2 to 6 feet. July and August

HANSON'S LILY (*L. Maculatum*). Attains a height of 3 feet. Flowers reddish orange, six to ten in a cluster; petals thick and durable.

MADONNA LILY (*L. Candidum*). Handsome, large, fragrant, pure white flowers. Easy of culture; does best when left undisturbed after planting.

SPECIOSUM LILY WHITE (*L. Speciosum Album*). One of the best garden lilies; purest white. Very hardy.

SPECIOSUM LILY, RED (*L. Speciosum Rubrum*). One of the most showy of lilies of medium height and not difficult to grow in any good garden soil. Like the preceding other than color, which is rosy red, beautifully marked with deeper red.

SPECIOSUM LILY, YELLOW (*L. Henryii*). A beautiful deep orange-yellow variety of the preceding, easily grown and very showy. 75 cents each.

TIGER LILY VAR. SPLENDENS (*L. Tigrinum*). This is an improved Tiger Lily and a most beautiful lily for general use.

TIGER LILY VAR. DOUBLE (*L. Tigrinum* var. fl. pl.) Similar to above other than the flowers which are quite double. Very desirable.

TORCH LILY (*Kniphofia Aloidis*). 3 to 5 feet. August to October. Orange and scarlet. Known as the Red Hot Poker. A desirable border plant.

FOR PRICES OF THE ABOVE HERBACEOUS PLANTS SEE PAGE 38.

Herbaceous Perennials
THE ELM CITY NURSERY COMPANY

TORCH LILY (*Kniphofia Pfitzerii*). 2 to 3 feet. August to October. Rich orange scarlet, an ideal border plant, very attractive.

TURK'S CAP LILY (*L. Superbum*). This native lily is one of the finest and most hardy of all lilies. It often attains a height of 6 feet, and produces a large number of flowers. Its flowers are bright orange in color with dark spots.

YELLOW GARDEN LILIES. (*Hemerocallis*)

AURANTIACA VAR. MAJOR (*H. Aurantiaca* var.). Orange yellow, new and rare. 2 to 2½ feet. June and July. Large and rich. 50 cents each.

***EARLY LEMON LILY** (*H. Minor*). 1 to 2 feet. Early June. Striking lemon yellow, fragrant.

***EARLY YELLOW LILY** (*H. Dumortierii*). 1 to 1½ feet. June. Deep yellow and fragrant, quite dwarf and makes a splendid foreground plant.

***LEMON LILY** (*H. Flava*). 2 to 3 feet. June and July. Clear lemon yellow; fragrant. This old garden lily is a great favorite.

***MIDDENDORF'S LILY** (*H. Middendorffiana*). 1 to 2 feet. June to July. Deep golden yellow.

***ORANGE MAN LILY** (*H. var.*). 1 to 2 feet. July and August. Rich deep orange; very beautiful.

***ORANGE LILY** (*H. Fulva*). 2 to 4 feet. July and August. This grand old lily is now much in demand. It is splendid for naturalizing in large masses. Large quantities at special prices for naturalizing along drives, etc.

ORANGE LILY VAR. KWANSO (*H. var.*). Rich orange red; semi-double; very effective and desirable.

ORANGE LILY VAR. VARIEGATA (*H. var.*). A form of the orange lily with variegated green and white foliage, which forms a very striking effect.

***THUNBERG'S LEMON LILY** (*H. Thunbergii*). Late blooming lemon lily. 2 to 3 feet. July and August. Fragrant and very desirable. Rich lemon yellow.

***LILY OF THE VALLEY** (*Convallaria Majalis*). A popular favorite and once planted increases in beauty for many years.

HARDY ROSES

ROSES FOR GARDENS are a specialty at the nursery, our sales amounting to many thousands annually. The plants are strong, field-grown bushes, large enough to make a sturdy growth and produce a profusion of bloom right away. This grade of plants is very popular with our customers.

Hybrid Roses.

Strictly Hardy Varieties.

This class of roses blooms profusely in June and at intervals throughout the Summer and Fall. The popular hardy garden roses mostly belong to this class and are always satisfactory.

Do not allow roses to suffer from want of plenty of fertilizer, as they are gross feeders, and only when they have plenty to feed on can they be expected to produce best results.

Alfred Colomb. Brilliant crimson. Very large full form. Extremely fragrant.

***Anne De Diesbach.** (Syn. Glory of France). Carmine, a beautiful shade; very large. A superior garden sort; fragrant.

Baron De Bonstetten. Rich velvety maroon; large, full. A splendid sort.

***Clio.** Flowers large, of fine globular form, flesh color, shaded in the center with rosy pink; growth vigorous.

***Countess of Oxford.** Carmine shaded violet, large and full.

***Francois Levet.** Cherry pink; medium size; well formed; vigorous habit.

***Frau Karl Druschki.** Flowers very large, beautiful, pure white. This is one of the best white hybrid perpetuals yet introduced.

***General Jacqueminot.** Brilliant crimson; not full, but large and extremely effective; fragrant, and of excellent habit.

Jules Margottin. Carmine rose, fine in open flower and in bud.

***Madame Gabriel Luizet.** Pink, distinct, very large, cup-shaped.

***Magna Charta.** Pink, suffused with earmine; full globular. Excellent rose.

***Margaret Dickson.** Of magnificent form; white, with pale flesh center; petals very large, shell shaped.

***Marshall P. Wilder.** Large, well formed; color cherry-carmine and very fragrant.

***Mrs. John Laing.** Soft pink; produced on strong stems.

***Mrs. R. G. Sharman Crawford.** Rosy pink, outer petals shaded with pale flesh, white at base of petals; of perfect imbricated form.

***Paul Neyron.** Deep rose color; by far the largest variety in cultivation.

***Prince Camille de Rohan.** Deep velvety crimson; large, moderately full.

Tom Wood. Cherry red, full, finely formed, borne on long stems.

***Ulrich Brunner.** Brilliant cherry red, a very effective color; flowers of fine form.

***Victor Verdier.** Bright rose, with earmine center, a very clear shade of color.

Hybrid Tea and other Perpetual Blooming Roses.

Very free bloomers; hardy with slight protection.

Aennchen Muller. Brilliant carmine-pink.

Baby Dorothy. Dwarf rose with large clusters of blooms, same color as the popular variety *Dorothy Perkins*.

***Baby Rambler.** Dwarf rose with great clusters of blooms of same color as *Crimson Rambler*. Blooms all summer.

***Caroline Testout.** Large. Clear bright rose color. Very sweet.

***Capt. Christy.** Flesh pink beautifully formed.

***Clothilde Soupert.** Very double, pearly white.

***Gruss an Teplitz.** Color scarlet shading to velvety crimson, very fragrant.

***Killarney.** A charming pink rose.

***Kaiserin Augusta Victoria.** An extra fine white variety; perfect in form.

***La France.** Delicate silvery rose, changing to silvery pink; very large, full.

***Maman Cochet.** Large, full, clear earmine.

White Killarney. A pure white variety of the now well-known *Killarney*.

***White Maman Cochet.** Pure white, tinged pink.

Wm. R. Smith. Large creamy-white with rose shadings, elegant form.

Winter Pruning Work.

You can arrange with us to annually look over your grounds and attend to the incidental annual pruning work which may be required. If left in our charge you can depend upon its being done in a thorough and skillful manner.

Wakefield, R. I., May 6, 1913.

The fruit trees arrived Thursday and our gardener reports them in excellent condition. The apple trees we set out a year ago are doing well, and we haven't lost a tree.

Nursery Department

We grow and supply the best grade of nursery stock the market affords. Our facilities are very complete, every department being under efficient management. That our methods are meeting with popular favor is evidenced by the rapid growth our business enjoys. By purchasing from our nurseries you are guaranteed *High-Quality* stock. Our nursery stock is grown under most favorable conditions, dug and packed by skilled and careful workmen, and can be depended on to produce maximum results when planted under favorable conditions. The nurseries are open to the public every day of the year, but positively no business will be transacted on Sunday.

Landscape Department

Where *best* results are anticipated in landscape and other gardening work, experience is a most important factor. Our Landscape Department is under well-equipped and expert management. We are glad to offer suggestions without charge to intending purchasers, but where landscape problems require special visits, plans, specifications, etc., a charge is made consistent with value of services rendered. We will be pleased to take up this matter more fully with those who are interested. Ample reference from those who have employed us.

Send for our cross-section *sketch-sheet* blank. On filling it out and returning it to us we will offer you valuable suggestions for your grounds without charge.

IMPORTANT LANDSCAPE PROBLEMS

It is seldom advisable to attempt to hurry through important landscape problems. Time enough should be given to work out an original idea, and thoughtfully get into shape necessary sketches, drawings and specifications, so that work can proceed methodically and, therefore, economically.

Popular Talks

Arrangements can be made for talks before Village Improvement Societies, Horticultural Societies, etc., on gardening, landscape and other kindred subjects, with or without lantern-slides.

Gardening Department

We maintain a force of competent gardeners who do gardening work in a thorough and practical manner. Pruning and otherwise caring for established trees, vines, etc., is a special feature of our work, and one that an owner can afford to put into experienced hands only. Many trees whose worth cannot be counted in dollars, which are perishing from neglect, can often be restored to health and given a new lease of life if given proper treatment.
